

The Deep Thinkers: April 1st Meeting

KATERINA BENEVIDES,¹ AIDAN PARFETT,¹ JUNQI QIU,¹ AND HAECHAN KIM¹

¹*EOSC 511* :)

AGENDA

What have we been up to? Plan for today? Going forward?

1. MEETING MINUTES

- Aidan done working on the analytical solution for 1D stage

- Haechan working on 2D stage,

- Kat working on analytical solution plotting and doing error analysis. We plot the numerical vs analytical solutions to visually assess how well the numerical solver approximates the true (analytical) solution.

- Kat computing the pointwise error at each grid point and time step by subtracting analytical solution from the numerical solution

- Kat will inquire about validity of error plots and how to derive results from them during Rachel's office hours on Thursday, April 2nd from 2:30pm onwards

- Everyone slowly making progress on presentation. Note that Aidan will take leave for a week (next week) for a conference, so Haechan, Kat, Junqi will present on behalf of the whole group at office hours the following week. Preference for going to Wednesday office hours in the morning as Kat has a presentation Thursday during the afternoon.
